Education

COMPUTER SCIENCE AND ENGINEERING | BATCH OF 2023 VELLORE INSTITUTE OF TECHNOLOGY | VELLORE

- Current CGPA: 8.6

ISC | DESOUZA'S SCHOOL | ROURKELA

- score: 85.1%
- (PCM+CS)

Projects

DOCSTREME

- DocStream is an alternative to Google docs it allows users to host their documents, access from anywhere and team mates to collaborate in real time.
- Uses socket.io to setup communication between client and server.
- Document can be hosted in just two steps, increasing the user experience.
- All data gets encrypted to provide users privacy no name email or identification required to get started.

BONDMAINTAINER

- Bond maintainer is a connection manager tool.
- It is integrated with **twilio API** allowing bond maintainer to send event reminders to user's phone number.
- File management using **multer** allows profile picture operations.
- Authentication integration with passportJs
- MongoDB integration to store user's data.
- Sensitive data is encrypted before storing into database.

SAY HELLO

- Say Hello is a speech to text/Sign Language converter.
- Window's tool kit is used for speech recognition.
- **Multer** integration allows profile picture operations.
- Authentication module integrated.

TRAVEL-BUDDY

- This site helps my college mates finding travel mates while travelling.
- Works on the real time database collected from the users.
- MongoDB in backend for data storage.
- Built using express on nodejs.
- Authentication enabled via Passport local strategy.
